

*Leaders of the future will have to be visionary and be able to bring people in - real communicators. These are things that women bring to leadership and executive positions, and it's going to be incredibly valuable and incredibly in demand.*

# ANITA BORG

Women's History Month celebrates Women in Computer Science

Anita Borg was an American computer scientist who is celebrated for her contributions to women in computing. After teaching herself to program, she went back to school and earned a Ph.D. in Computer Science from New York University in 1981. Her goal was to see 50% representation of women in computing by 2020; she started the Grace Hopper Celebration of Women in Computing and the Anita Borg Institute for Women and Technology. She was awarded the Augusta Ada Lovelace Award and was also appointed to the Presidential Commission on the Advancement of Women and Minorities in Science, Engineering, and Technology.
