

If I can't work with you, I will work around you. I was not about to be so discouraged that I'd walk away. That may be a solution for some people but it's not mine.

ANNIE EASLEY

Women's History Month celebrates Women in Computer Science

Annie Easley was an American computer scientist, mathematician, and rocket scientist. She worked as a computer at the National Advisory Committee for Aeronautics, which became NASA, and concurrently earned a Bachelor of Science in mathematics. Annie was one of the first African-Americans to work as a computer scientist at NASA. Her passion for STEM led her to become a leading member of the team that developed software for the Centaur rocket stage, contributing to the 1997 flight to Saturn of the Cassini probe.
