# TECH TOGETHER

FEBRUARY 25, 2017  
UNIVERSITY OF OREGON

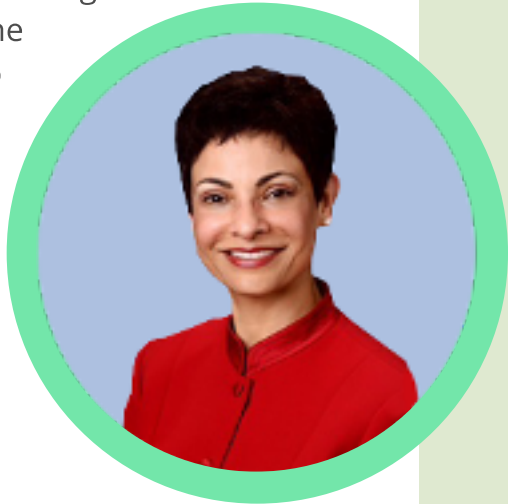

Oregon's First Student Run  
Women in Tech Conference

Shelmina is an empowerment speaker, former IBM Vice President, board member of United Nations Girl Up, and an angel investor/advisor. She is now focused on sharing the lessons she learned to help accelerate the success of women around the world.

**Shelmina  
Abji**

**Kathleen  
Lehman**

Kathleen leads the BRAID (Building, Recruiting, and Inclusion for Diversity) research study and will be speaking on the findings of the project, which aims to increase the number of women and students of color majoring in computer science.

## FEATURED

**women &**

**INFORMATION  
TECHNOLOGY**

NCWIT is a community that convenes, equips, and unites change leader organizations to increase the meaningful participation of all women in computing.

is an organization that focuses on strengthening the PDX women in tech community through educational programs, resources, and several other opportunities.

## Oregon

In 2014, 13% of Oregon's 387 total CS majors were women

Fewer girls took the AP computer science exam than any other AP exam

## Nationally

30% of women in private sector science, engineering, & technology jobs have felt extremely isolated at work

40% reported lacking role models

Nearly 50% reported lacking mentors

## TechTogether

Making mentorship a foundation

The Women in Computer Science (WiCS) Group at the University of Oregon thanks you for attending this event.
